Buy

For Online Ordering
Dailyneed and Delivery
Application

Touch n Buy allows your customers to grab up things from your online store within a few taps of their screen. As we know, customer trends have drastically changed and the online stores are the trending new. Touch n Buy is an all in one E-commerce & Online Marketing Application customized according to your preferences. In short, it will enhance overall Customer Experience (CX) at your store.

There are two major options in 'Touch n Buy':

Order in Shop

Order Online

Order in Shop

This application helps your customer to choose and purchase items from your store individually. The feature in our app updates your customers with instant product price and they can cross-check with their budget in real-time without the help of staff at your store. Also, it enables the cashier to print the bill with just a click of a button. In short, this application benefits you in a hassle-free shopping environment at your store.

- ➔ Barcode scanner for the instant product price
- ➔ Instant budget check
- ➔ Beforehand verification

Order Online

"Order Online" is an online marketing mobile application. It helps your customers to order and purchase goods from home or wherever they are. There are two options to favour your customer Self Pick-up or Home Delivery

In simpler words, they can choose the home delivery option or can schedule a time through the mobile app and pick up items from your store at a convenient time.

- ➔ Order from your convenient place
- ➔ Effortless purchases
- ➔ 24x7 purchase time

This application can be integrated into an individual-store mobile app or a single mobile application platform for a chain of stores.

Some of the general features of Touch n Buy are:
